

CCTV Unit

Clear-flow

Providing the Complete Service...

The CCTV Unit is ideal for:

- Locating underlining drainage problems such as collapsed pipes, tree root and infiltration issues
- Clearing blockages during a survey
- Homebuyer surveys
- Handover and adoption surveys
- Tracing and locating buried pipelines, manholes and tanks.

Clear-flow CCTV Units come equipped with onboard jetting facilities and are capable of surveying pipelines from 75mm up to 2000 mm in diameter. The vehicle's onboard computer allows surveys to be captured and reported onsite, thus improving efficiency and ultimately reducing the clients costs. Main-line crawler cameras have full pan, tilt and zoom. All cameras can be located above ground, pinpointing exact position and depth of defects as required. All operatives are fully trained and qualified in sewer classification, water jetting and signing, lighting and guarding. CCTV Units are equipped with full chapter 8 as standard.

TANK CAPACITY	TRACING DEPTH
• 180 gallons	• Up to 15 metres deep with specialist sonde (on request)
WEIGHT	HOSES
• 5 tonnes	• 120m Hydraulically Operated 1/2" hose reel
JETTING RATE	SURVEY DISTANCE
• 14 gallons / minute	• Up to 180 metres from one point
JETTING PRESSURE	Confined Space Entries
• Up to 3600 psi	• Available upon request
CCTV DIAMETER CAPABILITY	OPERATIVES
• 75mm to 2000mm	• Qualified to OS19X standard using MSCC4 reporting
