

Flexline

Clear-flow

Providing the Complete Service...

The Flexline

- Ideal for efficient, user friendly and reliable sewer cleaning
- Combined suction and jetting
- Movable partition dividing the tank into two sections of varying size
- Optimum flow and pressure conditions

A combined suction and jetting machine with a moving baffle to enable efficiencies due to fewer requirements to travel for water. Unit benefits from a cassette boom designed to reduce manual handling of hoses; unit has full remote control for all operational requirements. Also has 1 bar discharge pressure.
